

20260505 On Being Held Hostage Inside of a Nazi Coup de Tat

I am writing today to re-iterate, once again, that I still remain held within a technological false imprisonment wherein every movement that I make within my own house is being monitored by a military surveillance apparatus that is 'speaking on behalf' of Donald Trump.

The content of their messaging into my home is absolutely threatening, attempted extortion, and conveys the messages that I am held inside of a spy state prison by which there is no escape.

This is the current state of the United States of America as it is held captive by a military coup de tat.
